

To Environment Committee Co-Chairs Sen. Cohen and Rep. Gresko and Transportation Committee Co-Chairs Sen. Haskell and Rep. Lemar, and the distinguished members of these essential committees:

Please support the following bills:

HB 5039 and SB 4

It's past time to show how much we care about our environment in the state of CT. We need to do something NOW as the latest UN report is warning us that it is too late.

PLEASE show that you understand how important it is to reduce medium and heavy-duty emissions by adopting the standards that CA has adopted.

The Clean Air Act is equally important and I implore you to support its passage. If you want to live in a nice place, the minimum requirement would be clean air. Let's give the kids nice buses and show them that we care.

It's so important to do what we can and these matters really depend on leadership who is willing to show how much they care.

Thank you for your attention.
